Figure 1: Prevalence of depression in each LTC population

![Bar chart showing the percentage of LTC population with depression for various conditions.](chart_1)

- Learning disability
- CVD
- Heart failure
- Cancer
- PVD
- HHD
- Asthma
- Diabetes
- Stroke
- TIA
- Epilepsy
- Angina
- Dementia
- AF
- Hypothyroidism
- COPD
- SMI

Red line indicates the percentage of total population diagnosed with depression.

Figure 2: Access to unscheduled care in previous 12 months by number of LTCs

![Bar chart showing the percentage of patients accessing unscheduled care by number of LTCs.](chart_2)

- Total population
- Without LTC
- 1 LTC
- 2 LTCs (co-morbid)
- ≥ 3 LTCs (multi-morbid)
Figure 3: Interaction between age and depression on access to unscheduled care for patients with ≥ 1 LTC
