SUPPLEMENTARY MATERIALS

Psychological interventions for coronary heart disease: Cochrane systematic review and meta-analysis: List of online supplementary materials

Supplementary methods 1  Electronic database search strategy
Supplementary table 1  References to included studies
Supplementary table 2  Risk of bias: review authors' judgements about each risk of bias item across all included studies
Supplementary figure 1  PRISMA flow diagram
Supplementary figure 2  Forest plot of psychological intervention versus usual care: total mortality
Supplementary figure 3  Forest plot of psychological intervention versus usual care: revascularization procedures
Supplementary figure 4  Forest plot of psychological intervention versus usual care: non-fatal MI
Supplementary table 3  Health related quality of life scores at follow-up
Supplementary table 4  Meta-regression results for total-mortality, CV-mortality, depression and anxiety outcomes
Supplementary methods 1. Electronic database search strategy

Building on the searches undertaken for the 2nd update of this review, additional terms were added in 3rd update searches and no date restrictions were applied to those new terms (see below). Date restrictions (Jan 2009 – May 2015) were only applied to terms used in previous updates. The searches were then updated in April 2016 to ensure the review remained up to date (not reproduced below). The CENTRAL search has been restricted by publication year and the other searches were limited by entry date.
