### Table 2: Performance indicators for electro osmotic piles

<table>
<thead>
<tr>
<th>Indicator</th>
<th>Value</th>
<th>Reference</th>
</tr>
</thead>
<tbody>
<tr>
<td>Improvement factor, $n_o$</td>
<td>$s_o/s_t$</td>
<td>Priebe ()</td>
</tr>
<tr>
<td>Efficiency factor, $k$</td>
<td>$(s_t A_o)/(I t)$</td>
<td></td>
</tr>
<tr>
<td>Energy factor</td>
<td>$(V I t)/(A_o h)$</td>
<td>Lefebvre and Burnotte (2002)</td>
</tr>
</tbody>
</table>

Where $s_o$ is the settlement of the untreated soil; $s_t$ is the settlement of the treated soil; $A_o$ is the total area of treatment; $V$ is the voltage; $I$ is the average current over the time of treatment, $t$; and $h$ is the depth of treated soil.
