Figure 2

A simple 1\textsuperscript{st} order CFA Model

A simple 2\textsuperscript{nd} order CFA Model
Figure 3  Example of a model of sub-domains and the overall measure of the first domain (Socio-economic security) using BHPS

Overall measure

Economic
- Good finances
- Finances improving
- Can save

Housing/Environment
- Satisfied with housing
  - Space
  - Heating
  - No damp
  - Good environment
  - No crime

Health
- Health status
  - No limitations

Work
- Sat job security
- Job satisfaction

Education
- Human capital
  - High education
  - Recent training
  - Job opportunities
  - Promotion prospects
Figure 4  Low-pay Britain

Source: Savage (2011)
Figure 5  Mean scores of the four domains of social quality by equivalised income group (quintiles Q1=lowest, Q5=highest)

ANOVA tests for equality of means show significant differences for all four domains (p<0.05) and all except social cohesion at p<0.01.
ANOVA tests for equality of means show significant differences for all four domains (p<0.01).
