**Figure 1. Illustrations of different food packaging closures tested with participants.**

**Figure 2. Total number of participants who affirmed to have difficulties opening different food packaging closures.**

P- value from Z-score test for one proportion for each closure type appears beside each closure bar.

**Figure 3. Preference of packaging material per country and category (abbreviated as cat.; (cat.1: living at home with help for food purchasing; cat. 2: living at home with help for food preparation, cat. 3: living at nursing home).**

**Figure 4. Percentages of participants who affirmed to use special tools to open caps (Yes, always/Sometimes) and the ones who that not used (Rarely/No, never)**

**Figure 5. Percentage (per country) of respondents who use different kitchen devices in the two different categories.**
