# Supplemental Information

## Supplemental Table 1

Population/ region	n = (take from current numbers)	Recruitment strategy	Inclusion criteria	Exclusion criteria
Birmingham, Middlesborough, Glasgow	1537	Advertisement in schools and colleges	Children aged 5-18 years. Ability to give verbal assent and for those over 16 written consent	1) inability to give informed consent, (2) height or weight outside the 0.4th and 99.6th centiles on current growth reference curves (3) history of recurrent low trauma fractures or any fracture in the past 12 months, (4) prolonged periods of immobilisation in the past 12 months, (5) systemic disease, (6) any condition, or use of any drugs known to affect bone health (children were included if they used inhaled corticosteroids because of evidence suggesting that these drugs do not adversely affect BMD) (7) participation in research involving ionising radiation in the past 12 months,
London	372	Advertisement in schools and colleges, GP practices and hospital advert	Children aged 5-18 years. Ability to give verbal assent and for those over 16 written consent	1) inability to give informed consent, 2) prolonged periods of immobilisation in the past 12 months, 3) systemic disease, 4) any condition, or use of any drugs known to affect bone health (children were included if they used inhaled corticosteroids because of evidence suggesting that these drugs do not adversely affect BMD)
Sheffield	830	1) Advertisement in schools and colleges, GP practices and hospital advert 2) Healthy children with moderate or high trauma fracture recruited as part of a study from Emergency Department and age-matched controls without fractures	White Caucasian children aged 5-18 years. Ability to give verbal assent and for those over 16 written consent	1) inability to give informed consent, 2) prolonged periods of immobilisation in the past 12 months, 3) systemic disease, 4) any condition, or use of any drugs known to affect bone health (children were included if they used inhaled corticosteroids because of evidence suggesting that these drugs do not adversely affect BMD)
Leeds	171	Healthy controls recruited as part of a cystic fibrosis study using a 'buddy' approach	White Caucasian children aged 5-18 years. Ability to give verbal assent and for those over 16 written consent	1) inability to give informed consent, 2) prolonged periods of immobilisation in the past 12 months, 3) systemic disease, 4) any condition, or use of any drugs known to affect bone health (children were included if they used inhaled corticosteroids because of evidence suggesting that these drugs do not adversely affect BMD)
Manchester	587	Advertisement in schools and colleges, GP practices, healthcare centres, University of Manchester staff and student lists.	White Caucasian children aged 5-18 years. Ability to give verbal assent and for those over 16 written consent	1) inability to give informed consent, (2) height or weight outside the 0.4th and 99.6th centiles on current growth reference curves (3) history of recurrent low trauma fractures or any fracture in the past 12 months, (4) prolonged periods of

				immobilisation in the past 12 months, (5) systemic disease, (6) any condition, or use of any drugs known to affect bone health (children were included if they used inhaled corticosteroids because of evidence suggesting that these drugs do not adversely affect BMD) (7) participation in research involving ionising radiation in the past 12 months, (8) first-degree relative with primary osteoporosis (9) in females, current or past pregnancy

**Supplemental Figure 1** Bone Densitometer Differences using the European Spine Phantom. Mean ( $\pm$  95% CI)  
**A - Bone Density ( $\text{g}/\text{cm}^2$ )**

**B - Bone Mineral Content (g)**

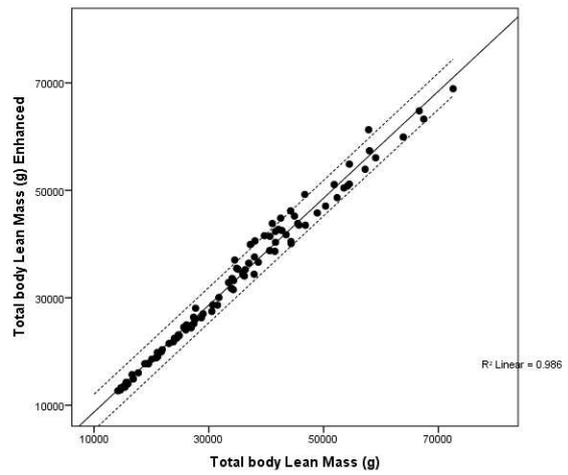

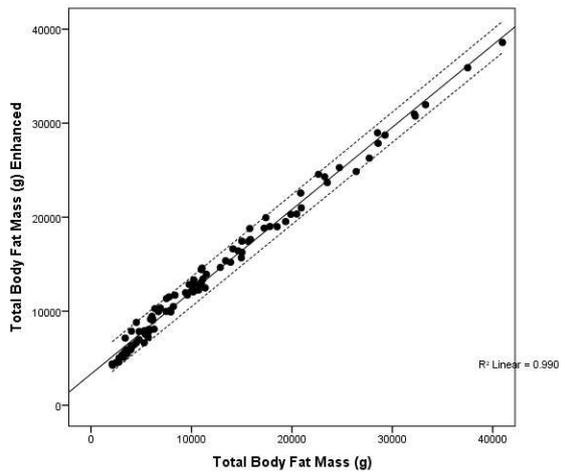

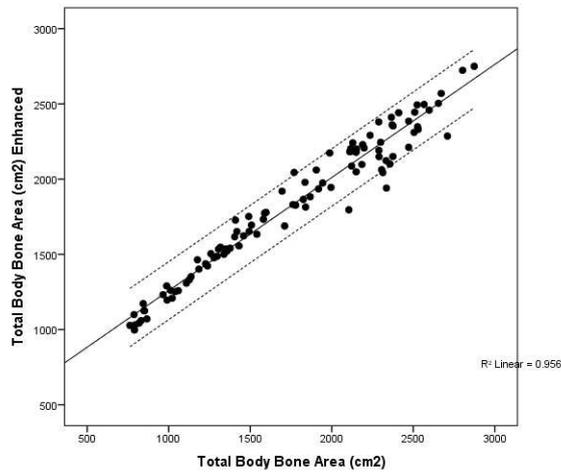

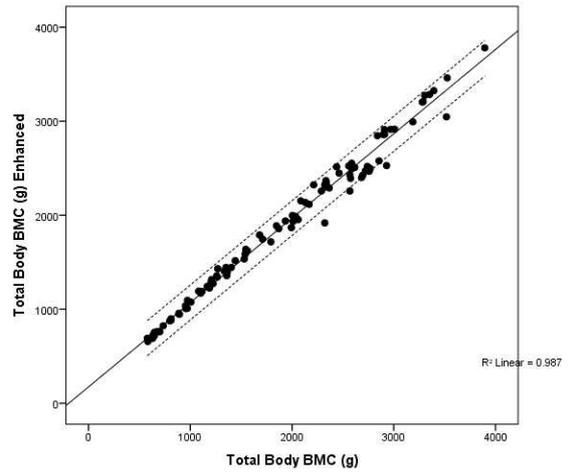

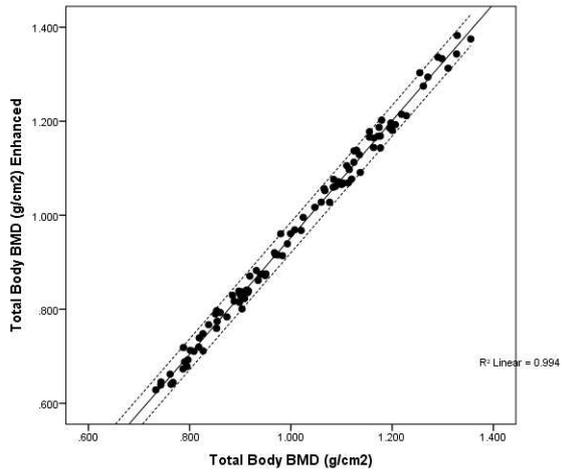

**C - Bone Area ( $\text{cm}^2$ )**

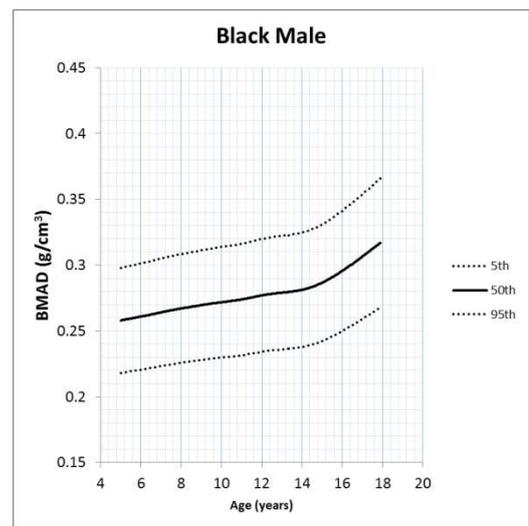

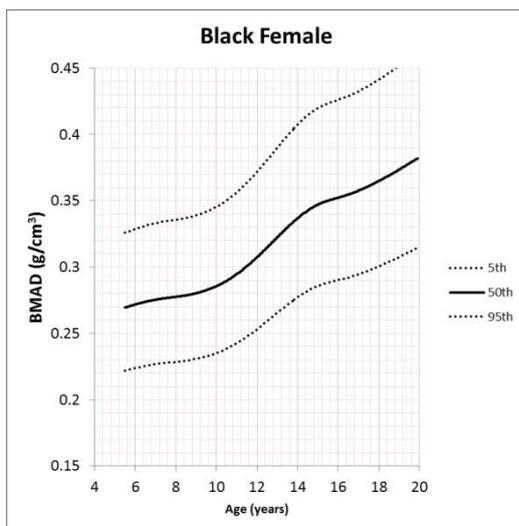

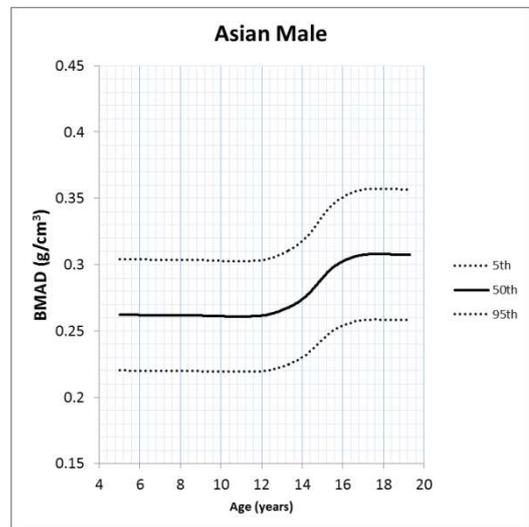

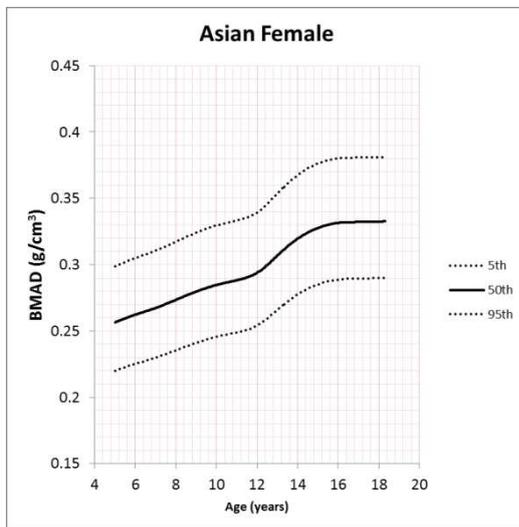

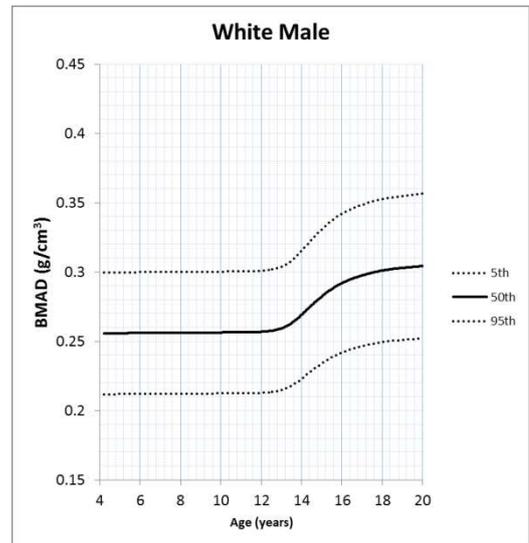

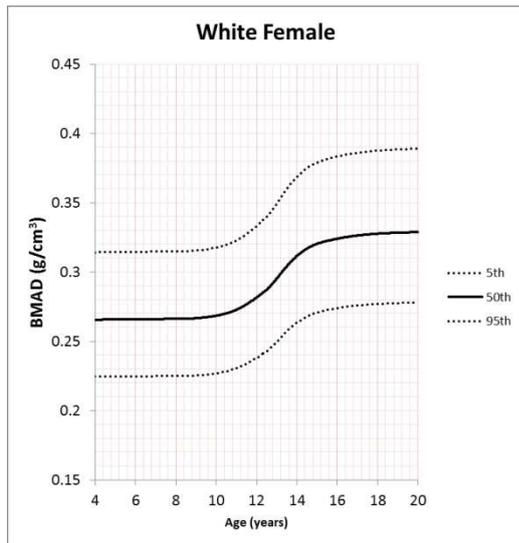

No Significant differences were detected between GE scanners, Hologic scanner estimated significantly higher bone area ( $p= 0.010$ ).
