28 Months Later: Pandemic Crime in England and Wales to July 2022

Hulya Seyidoglu, Anthon Dixon, Jose Pina-Sanchez, Nicolas Malleson and Graham Farrell, University of Leeds

By July 2022, violence and sexual offences, and theft from the person, remained statistically significantly lower than expected levels, with burglary, car crime, robbery and shoplifting far below expected levels (but falling within the rapidly expanding 95% confidence intervals). The other six crime categories plus anti-social behaviour were at or trending towards expected levels. Recorded crime rates per 10,000 population are in orange, expected rates are dashed, with grey-shaded 95% CIs.

Source: data.police.uk - all police services except Greater Manchester. Expected rates calculated with Hyndman et al.'s (2020) AutoARIMA R package. © The Authors (2021).
