Box 3: Quotes from the consultation observation relating to preferences and values

| | |
|----------------------------------|--|
| Motivation for treatment | <p>“the gap just bothers me a little bit” [CC02, patient]</p> <p>“..like the bottom ones... like make them a bit bigger and the gaps kind of smaller..” [Patient1]</p> <p><i>“I’d like to get my teeth sorted out”</i> [Patient2]</p> |
| Importance of preferences | <p><i>“Because the way we’re going to decide what to do is how you feel about the options... that depends on how you feel about the spaces which is kind of over to you”</i> [CC03, Orthodontist]</p> <p>“We really need your opinion” [CC03, Restorative Dentist]</p> |
| Parent preference | <p>“When we were given options last time as I explained I would rather close the space than put in a false one.... Because err I think that the false one will come out over time.... So I thought maybe just close the gap is the best” [CC02, Parent]</p> |
