Improving facial prosthesis construction with a contactless scanning and digital workflow: A feasibility crossover randomized controlled trial of digital versus conventional manufacture of orbital and nasal prostheses

Rachael Y. Jablonski, BDS, MFDS RCS(Ed), PhD,^a Trevor J. Coward, PhD, MPhil, FIMPT, FETC,^b Caroline Reed, MSc, BSc (Hons), DPS, MIMPT,^c Paul Bartlett,^d Andrew J. Keeling, BSc, BDS, MFGDP, PhD,^e Chris Bojke, BA(Hons), MSc, PhD,^f Brian R. Nattress, BChD, PhD, MRDRCS(Ed), FDSRCS(Ed), FDTF(Ed),^g and Sue H. Pavitt, BSc, PhD^h

Declarations of interest: None.

Presented at the General Session and Exhibition of the International Association for Dental, Oral and Craniofacial Research (IADR), March 13-16, 2024, New Orleans, La.

Supported by the National Institute for Health and Care Research (NIHR) (NIHR300235; recipient: R. J.) and by the Leeds Hospitals Charity, Funding for Research and Innovation (ULXXO/A200515; recipient: R. J.), Leeds, England, United Kingdom. This research was supported by the NIHR infrastructure at Leeds. The funding sources had no influence in the conduct of the study, writing of the report, or the decision to submit the manuscript for publication.

The views expressed in this publication are those of the authors and not necessarily those of the NIHR, NHS, or the UK Department of Health and Social Care.

^aSpecialty Registrar in Restorative Dentistry and NIHR Academic Clinical Lecturer, Department of Restorative Dentistry, School of Dentistry, University of Leeds, Leeds, England, United Kingdom.

Acknowledgments:

The authors thank Syeda Khalid, Cecile Jones, and Cecilie Osnes (Leeds Digital Dentistry) for their help in refining the digital manufacturing workflow; the SMILE AIDER Patient and Public Involvement and Engagement forum (Leeds School of Dentistry) for co-designing the study; and Farag Shuweihdi, Nuria Navarro Coy, and Gillian Dukanovic (Dental Translational and Clinical Research Unit) for their statistical and operational support. The authors also thank Sabah Zaulifqar (Leeds Dental Institute) and Naimesha Patel, Sara Guerrero-Appleford, Paramjit Kaur, and Sameera Patel (Guy's and St Thomas' NHS Foundation Trust) for their maxillofacial prosthetic expertise, and Lindsey Robinson (Guy's and St Thomas' NHS Foundation Trust) for providing administrative support. Finally, the authors thank the Independent Advisory Committee members David Torgerson, Callum Cowan, Kalpita Baird, Robin Fahey, and Peter Stevenson for their methodological, clinical, and experiential expertise in overseeing the study.
