Reviewers in 2021

David J. Beerling

Editor-in-Chief

Despite the continued difficulties that have come with the pandemic, our peer reviewers once again stepped up to support Biology Letters. The vital feedback that reviewers provided authors enabled us to continue publishing high-quality articles that benefit the entire scientific community. The Editors of the Journal would therefore like to express their sincere thanks to all those who contributed their time by refereeing manuscripts submitted throughout 2021.

We know that most reviewers value recognition of their efforts by the journal and through services, such as Publons, which is integrated with *Biology Letters*. To provide an opportunity for recognition, we also list the names of all reviewers (unless they have opted out). This article is made permanent and citable by its digital object identifier (DOI). We encourage you to quote your contribution in your applications for tenure and grants or other forms of research assessment. Where you have provided it, we have included your ORCID, so your contribution can be unambiguously assigned to you.

As always, the team really does appreciate all the work our reviewers do on behalf of the journal, and we look forward to working with you again in 2022.
