Article:
Quain, MD, Makgopa, ME, Márquez-García, B et al. (6 more authors) (2014) Ectopic phytocystatin expression leads to enhanced drought stress tolerance in soybean (Glycine max) and Arabidopsis thaliana through effects on strigolactone pathways and can also result in improved seed traits. Plant Biotechnology Journal, 12 (7). 903 - 913. ISSN 1467-7644
