## **Social Quality and Work: What Impact Does Low Pay Have on Social Quality?**

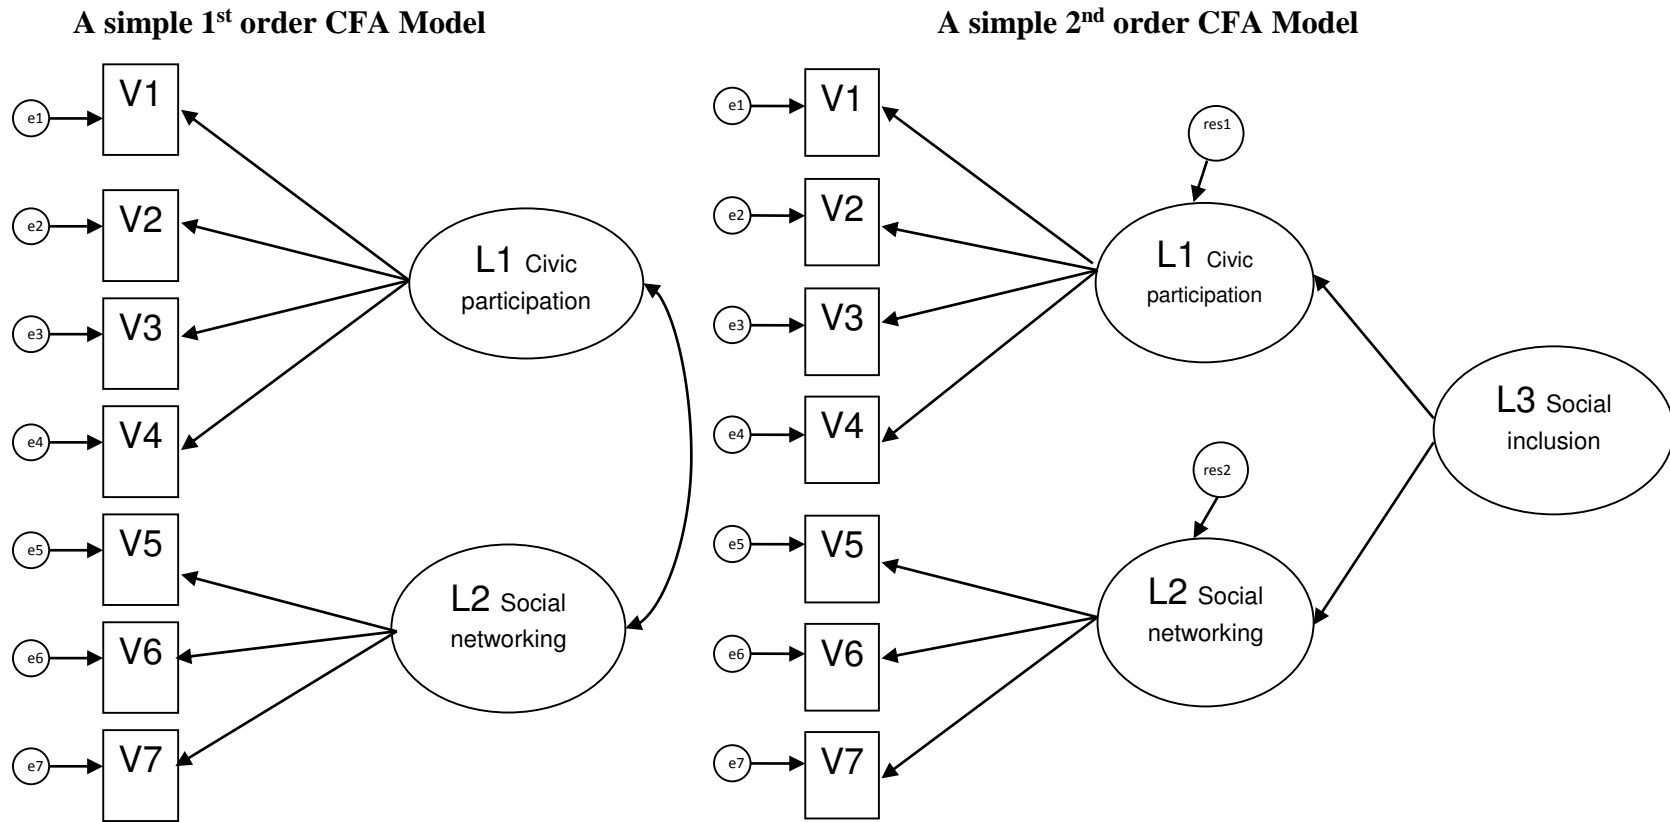

Figures

**Figure 1: The Conditional Factors of Social Quality**

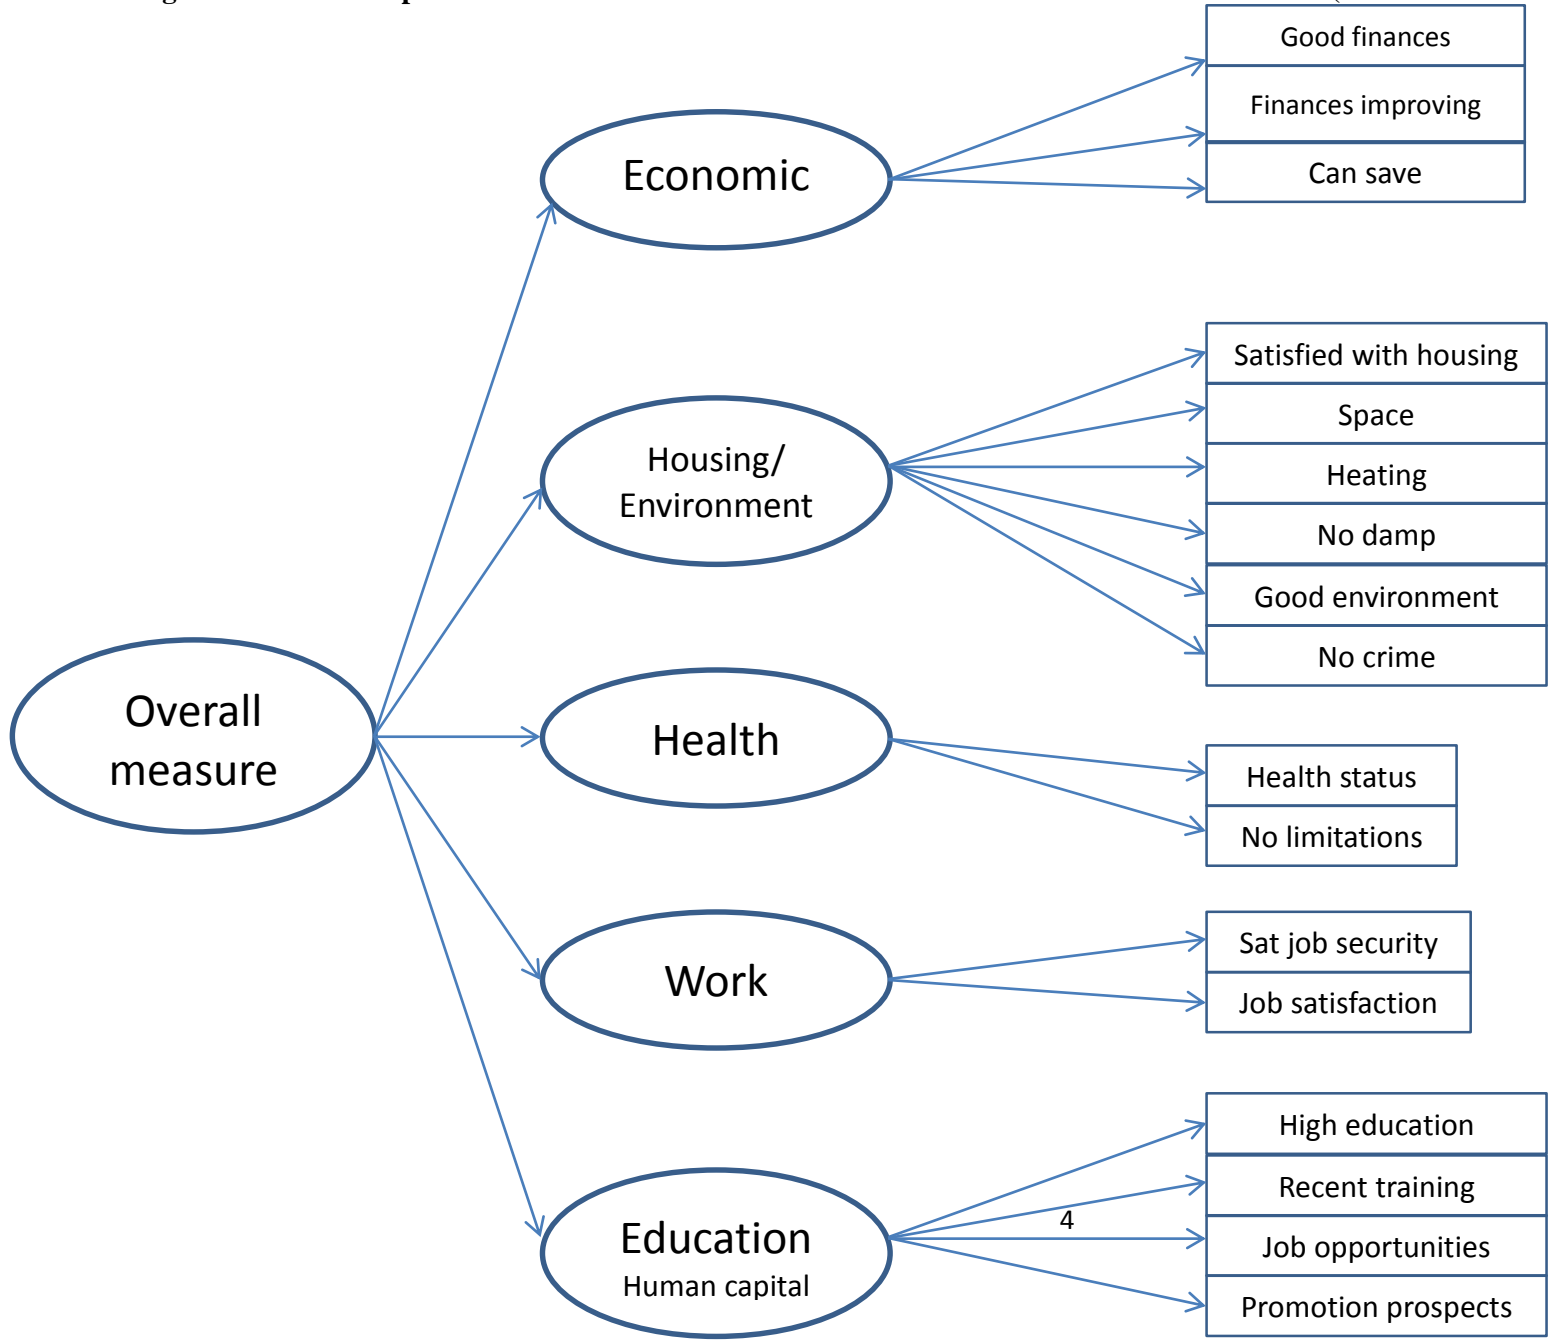

Source: (blinded for review)

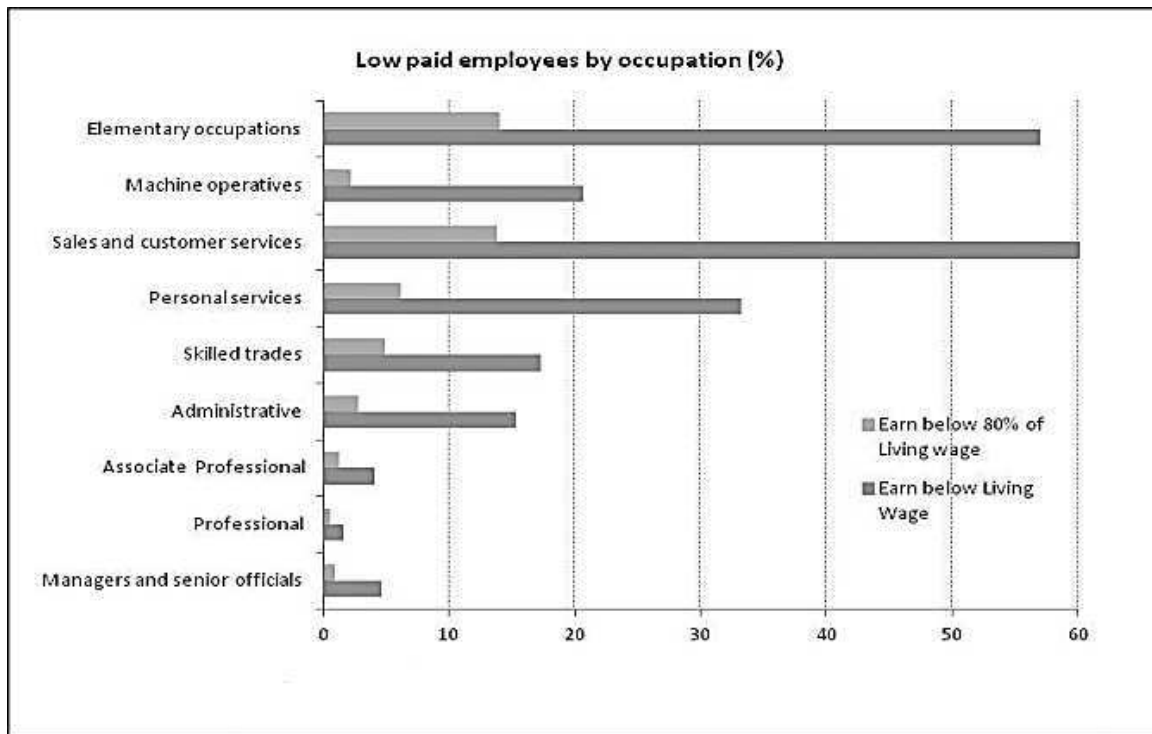

**Figure 2**

**Figure 3** Example of a model of sub-domains and the overall measure of the first domain (Socio-economic security) using BHPS

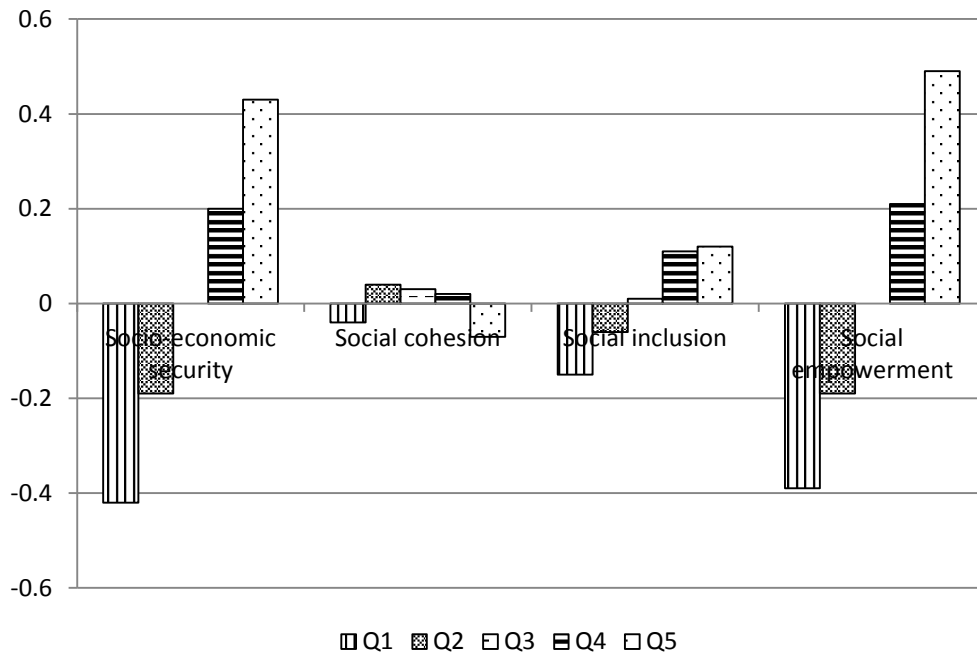

**Figure 4 Low-pay Britain**

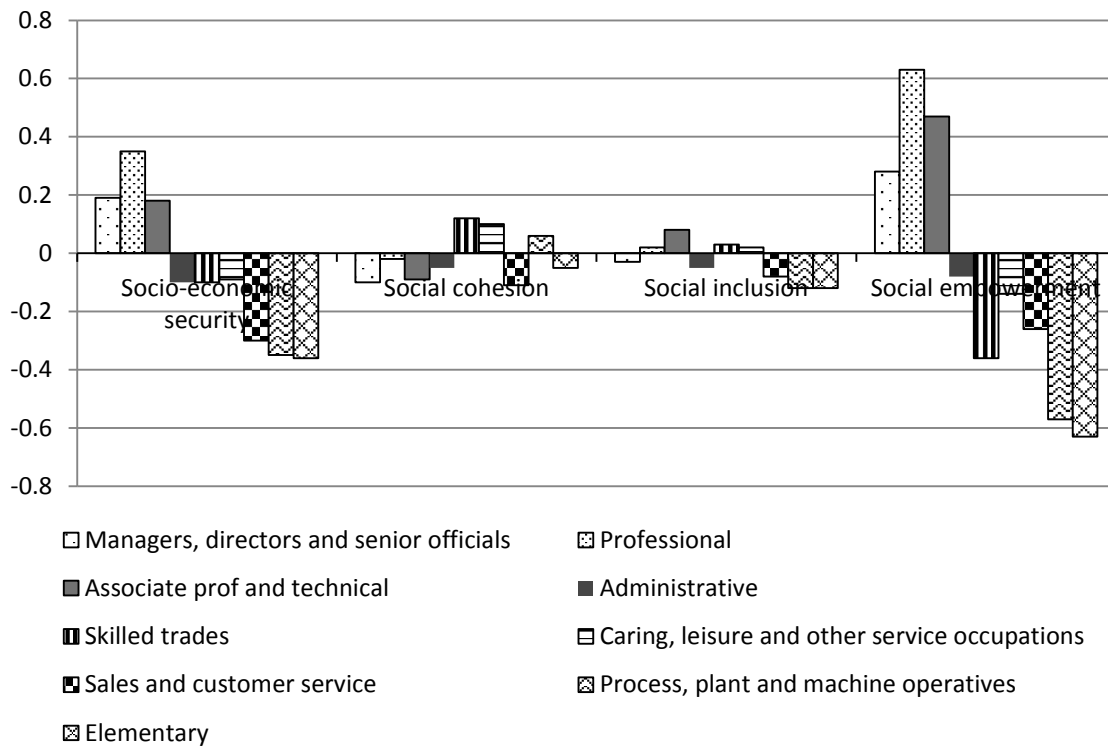

Source: Savage (2011)

**Figure 5** Mean scores of the four domains of social quality by equivalised income group (quintiles Q1=lowest, Q5=highest)

ANOVA tests for equality of means show significant differences for all four domains ( $p < 0.05$ ) and all except social cohesion at  $p < 0.01$ .

**Figure 6 Mean scores of the 4 domains of social quality by occupation**

ANOVA tests for equality of means show significant differences for all four domains ( $p < 0.01$ ).
